Commissioner for Patents

The claims in this application contain too many errors to enable a reasonable search of the prior art by the examiner. The Markush groups are not in proper format and there are numerous 112 (2nd) issues with lack of antecedent and broad limitation followed by narrow limitation. For example, in claim 1, the specification of R3 does not have an "or" before the last species. Each of R4 to R7 is given a broad group followed by an "and" and a particular species, making it unclear as to which limitation is being claimed. In numerous places, "the hydrogen", "the methyl" and "the mixture" are used when it is more proper to use "a hydrogen", "a methyl" and "a mixture". Claim 4 recites a polymer and copolymer of claim 1 while claim 1 has only the former. The copolymer therefore lacks antecedent basis. Claim 4 recites "monomers selected from:" followed by numerous monomers grouped into a), b), c) and d), each group contains groups of monomers. Since a proper Markush group is absent, it is not clear if the monomers can be selected from any monomers in any group, or one monomer is selected from each group. In the description of "R" in claim 4, the language is very confusing since R is said to belong to group A and group B and group C...(and then) or group X. It does not make much sense to say R (simultaneously) belongs to distinct groups. Many errors found in the claims are also found in the specification (such as the issue with 'R' in claim 4).

Applicant is required to submit an amendment which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

A shortened statutory period for reply to this action is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter.

Any inquiry concerning this communication should be directed to Vu Nguyen whose telephone number is (571)270-5454, or the examiner's supervisor, David Wu who can be reached on 571-272-1114.
